DIAGNOSIS

INDICES to Vol. 7 (1968)

January March May July September November

Contents of Volume 7 — DIAGNOSIS

Transuterine phlebography with particular reference to pelvic varicosities
By N. Chidekel and K.-O. Edlundh 1
Upper urinary tract duplication associated with ectopic ureterocele in childhood and infancy
By E. Lundin and W. Riggs 13
Aortitis syndrome with special reference to pulmonary vascular changes
By T. Kozuka, T. Nosak , K. Sato and K. Ihara 25
Anastomoses between extracardiac vessels and coronary arteries — III — Microangiographic appearance
By A. Moberg 33
Circulatory effects of iothalamate compounds (Conray) and media of the benzoic acid type
By P. Lindgren, G.-F. Saltzman and G. Törnell 48
Angiographic, microangiographic and histologic study of vascular malformation in striated muscle
By L. Angervall, L. Nilsson, B. Stener and I. Wickbom 65
Traumatic bronchial rupture — Acute stage diagnosed by bronchography
By M. Haverling 72
Roentgenographic study of the soft palate during phonation at high ambient air pressure
By G. Bengtsson and B. Sonesson 79
Integral dose in 70-mm fluorography of the gastroduodenal tract
By C. Carlsson and J. Kaude 84
Dilatation de la citerne pericarotidienne suscaverneuse
Par A. Wackenheim et J. P. Braun 89
Book reviews 96
Roentgenologic evaluation of cranial size in children — A new index
By Cronqvist S. 97
Electrocardiograms on carotid angiography after puncture of the carotid sinus .
By H. Lodin 112
Electrocardiograms on vertebral angiography
By H. Lodin 117
Temporal arterial geodesics — II — Effects of masses deep to the temporal lobe
By H. Z. Lehrer 124
Roentgenologic changes in otosclerosis
By B. Liliequist 129
Embolism and spasm following subarachnoid hemorrhage
By P. A. Katsiotis and J. N. Taptas 140
Densitometric and visual evaluation of the circulation time in carotid angiography — A methodologic study
By T. Greitz and B. Syk 145

Vascular reaction to water-soluble contrast media — Significance of concentration and total amount of iodine
By P. Lindgren, G.-F. Saltzman and G. Törnell 152
Focal spot variations with exposure data — Important factors in daily routine
By O. Mattsson 161
Integral dose in 35-mm cinefluorography of the gastrointestinal tract
By J. Kaude 170
Serial nephroangiography in hypertension
By E. Hotovy, A. Losonci and J. Lakos 177
Book reviews 192
Female pelvic veins demonstrated by selective renal phlebography with particular reference to pelvic varicosities
By N. Chidekel 193
Ureteric imprint caused by the left gonadal vein
By O. Bartley and N. Chidekel 212
Anterior meningeal branch of the vertebral artery
By T. Greitz and T. Laurén 219
Nephroangiography in periarteritis nodosa — Report of a case
By F. Efsen and U. Lorenzen 225
Anomalous pulmonary venous drainage to below the diaphragm
By L. Björk 231
Photographic procedure in cineroentgenography
By O. Mattsson 237
Barium contrast agents
By G. Embring and O. Mattsson 245
Idiopathic scoliosis caused by a short spinal cord
By M. Roth 257
Radiation damage to roentgen films
By A. Lundh 272
Book reviews 286
Urography in relation to renal function
By O. Bartley, U. Bengtsson and S. Stattin 289
Roentgenologic investigation of the nasopharyngeal tonsil in children of different ages
By S. Jóhannesson 299
The path of the ultrasonic beam in clinical echoencephalography
By R. Horenstein, A. Persson, A. Wennberg and L. Widén 305
Aneurysm associated with aortitis syndrome
By T. Kozuka, T. Nosaki, K. Sato and H. Tachiiri 314
Venous arteriography — A modified technique and indications for its use
By N.-E. Ahlberg, O. Bartley and N. Chidekel 321
Normal cerebral circulation time as determined by carotid angiography with sodium and methylglucamine diatrizoate (Urografin)
By T. Greitz 331
Brachial vertebral angiography without a catheter
By B. Zachrisson 337
Nontraumatic percutaneous catheterization of blood vessels with guide wires
By C. Becker and H.-W. Becker 348

Roentgen examination of stricture of the lower oesophagus
By W. Mortensson and S. Sandmark 355
Ultrasonics as a complement to roentgen diagnosis — A preliminary communication
By O. Mattsson 361
Radiologic study of intracranial calcifications in congenital toxoplasmosis
By H. Müssbichler 369
Isotope scanning of brain tumors using ^{99m}Tc
By E. J. Filson and A. Rodriguez-Antunez 380
Size and development of the cerebral ventricular system in childhood
By H. Lodin 385
Regional cerebral blood flow in intracranial tumours
By S. Cronqvist and F. Agee 393
Effect of angiotensin on the dog kidney
By E. Hotovy, A. Losonci and J. Lakos 405
Epinephro-phlebography in two cases of Conn's syndrome
By C. G. Mikaelsson 410
Hamartoma (lipoangiomyoma) of the kidney
By S. Falkmer, P. Junghagen, O. Rais and G.-F. Saltzman 417
Renal arteriovenous malformation
By B. Gunterberg 425
Occurrence of valves in the main trunk of the renal vein
By N.-E. Ahlberg, O. Bartley and N. Chidekel 431
Lymphatic circulation in experimental myocardial infarction
By A. Celis, H. Marquez, H. Del Castillo and D. Mijangos 438
Pathologic features of bone — Tentative classification of bone lesions
By N. P. G. Edling 449
Pulmonary haemorrhage in renal disease
By W. Mortensson, L. E. Larsson and B. Lindqvist 457
Bends in the coronary arteries after removal of muscle bridges
By O. Eliška, V. Skop and P. Hamet 470
Drainage of radiographic contrast media from the abdominal cavity — Experimental studies in rats
By I. Lindgren, E. J. Nagy and P. Virtama 481
Bradycardial reactions in cerebral angiography induced by sodium and methylglucamine iothalamate (Conray) — Comparison with Urografin in a controlled study in man
By G. Törnell 489
Excretion of metrizoate in man
By J. B. Dawson, E. W. McChesney and F. F. Teller 502
Position of the lumbar intumescence of the spinal cord
By J. Jirout 509
Normal topography of the cerebral ventricular system in childhood
By H. Lodin 512
Regional cerebral blood flow and angiography in apoplexy
By S. Cronqvist 521
Pneumosinus dilatans
By G. Lombardi, A. Passerini and A. Cecchini 535
Mimer III and rotating chair
By G. Fredzell, T. Greitz, A. Grepe and L. Holmström 543

Subject index to Volume 7 — Diagnosis

ROENTGEN DIAGNOSIS

Nervous system

Dilatation de la citerne pericarotidienne suscaverneuse 89
Cranial size in children — A roentgenologic index 97
Electrocardiograms on carotid angiography after puncture of the carotid sinus 112
Electrocardiograms on verebral angiography 117
Temporal arterial geodesics — II 124
Embolism and spasm following subarachnoid hemorrhage 140
Circulation time in carotid angiography — Densitometric and visual evaluation . . . 145
Anterior meningeal branch of the vertebral artery 219
Path of ultrasonic beam in clinical echoencephalography 305
Normal cerebral circulation time as determined by carotid angiography with sodium and methylglucamine diatrizoate 331
Brachial vertebral angiography without a catheter 337
Intracranial calcifications in congenital toxoplasmosis 369
Isotope scanning of brain tumours using ^{99m}Tc 380
Size and development of the cerebral ventricular system in childhood 385
Regional cerebral blood flow in intracranial tumours 393
Bradycardia in cerebral angiography induced by Conray — Comparison with Urografin 489
Position of the lumbar intumescence of the spinal cord 509
Normal topography of the cerebral ventricular system in childhood 512
Regional cerebral blood flow and angiography in apoplexy 521

Digestive tract (incl. biliary tract and spleen)

Integral dose in 70-mm fluorography of the gastroduodenal tract 84
Integral dose in 35-mm cinefluorography of the gastrointestinal tract 170
Stricture of the lower oesophagus 355

Heart and Vessels (incl. lymphatic vessels)

Transuterine phlebography 1
Aortitis syndrome and pulmonary vascular changes 25
Anastomoses beteen extracardiac vessels and coronary arteries III 33
Circulatory effects of iothalamate compounds and media of the benzoic acid type . . . 48
Angiographic, microangiographic and histologic study of vascular malformation in striated muscle 65
Electrocardiograms on carotid angiography after puncture of the carotid sinus 112
Electrocardiograms on vertebral angiography 117
Temporal arterial geodesics. II 124
Embolism and spasm following subarachnoid hemorrhage 140
Circulation time in carotid angiography — Densitometric and visual evaluation . . . 145
Vascular reaction to water-soluble contrast media — Significance of concentration and total amount of iodine 152
Nephroangiography in hypertension 177

Female pelvic veins demonstrated by selective renal phlebography 193
Ureteric imprint caused by the left gonadal vein 212
Anterior meningeal branch of the vertebral artery 219
Nephroangiography in periarteritis nodosa 225
Anomalous pulmonary venous drainage to below the diaphragm 231
Aneurysm associated with aortitis syndrome 314
Venous arteriography 321
Normal cerebral circulation time as determined by carotid angiography with sodium and methylglucamine diatrizoate 331
Brachial vertebral angiography without a catheter 337
Percutanous catheterization of blood vessels with guide wires 348
Regional cerebral blood flow in intracranial tumours 393
Effect of angiotensin on the dog kidney 405
Epinephro-phlebography in Conn's syndrome 410
Renal arteriovenous malformation 425
Valves in the main trunk of the renal vein 431
Lymphatic circulation in experimental myocardial infarction 438
Bends in the coronary arteries after removal of muscle bridges 470
Bradycardia in cerebral angiography induced by Conray — Comparison with Urografin 489
Regional cerebral blood flow and angiography in apoplexy 521

Lungs, Pleura, Mediastinum and Chest walls

Aortitis syndrome and pulmonary vascular changes 25
Traumatic bronchial rupture diagnosed by bronchography 72
Pulmonary haemorrhage in renal disesae 457

Bones and Joints (incl. soft tissue)

Angiographic, microangiographic and histologic study of vascular malformation in striated muscle 65
Cranial size in children — A roentgenologic index 97
Anomalous pulmonary venous drainage to below the diaphragm 231
Idiopathic scoliosis caused by a short spinal cord 257
Pathologic features of bone — Classification of bone lesions 449

Ear, Nose and Throat

Soft palate during phonation at high ambient air pressure 79
Roentgenologic changes in otosclerosis 129
Nasopharyngeal tonsil in children 299
Pneumosinus dilatans 535

Uro-Genital system

Transuterine phlebography 1
Upper urinary tract duplication associated with ectopic ureterocele in childhood . . . 13
Nephroangiography in hypertension 177
Female pelvic veins demonstrated by selective renal phlebography 193

Ureteric imprint caused by the left gonadal vein . . . 212
Nephroangiography in periarteritis nodosa . . . 225
Urography in relation to renal function . . . 289
Hamarthoma (lipoangiomyoma) of the kidney . . . 417
Renal arteriovenous malformation . . . 425
Valves in the main trunk of the renal vein . . . 431
Pulmonary haemorrhage in renal disease . . . 457

RADIOACTIVE ISOTOPES

Isotope scanning of brain tumours using ^{99m}Tc . . . 380
Regional cerebral blood flow in intracranial tumours . . . 393
Regional cerebral blood flow and angiography in apoplexy . . . 521

TECHNIQUE

Integral dose in 70-mm fluorography of the gastroduodenal tract . . . 84
Focal spot variations with exposure data . . . 161
Integral dose in 35-mm cinefluorography of the gastrointestinal tract . . . 170
Photographic procedure in cineroentgenography . . . 237
Radiation damage to roentgen films . . . 272
Path of ultrasonic beam in clinical echoencephalography . . . 305
Percutaneous catheterization of blood vessels with guide wires . . . 348
Ultrasonics as a complement to roentgen diagnosis . . . 361
Isotope scanning of brain tumors using ^{99m}Tc . . . 380
Mimer III and rotating chair . . . 543

CONTRAST MEDIA

Circulatory effects of iothalamate compounds and media of the benzoic acid type . . . 48
Vascular reaction to water-soluble contrast media — Significance of concentration and total amount of iodine . . . 152
Barium contrast agents . . . 245
Normal cerebral circulation time as determined by carotid angiography with sodium and methylglucamine diatrizoate . . . 331
Drainage of radiographic contrast media from the abdominal cavity . . . 481
Bradycardia in cerebral angiography induced by Conray — Comparison with Urografin 489
Excretion of metrizoate in man . . . 502

BOOK REVIEWS

Principles of X-ray diagnosis of the skull . . . 96
Bone tumours . . . 96
An atlas of detailed normal pneumoencephalographic anatomy . . . 192
Angiographie in der Knochenpathologie . . . 192
Progress in pediatric radiology . . . 286
Grenzen des Normalen und Anfänge des Pathologischen im Röntgenbild des Skelets . 287
Roentgen diagnosis of diseases of bone . . . 287
L'exploration neuroradiologique en ophtalmologie . . . 288
Radiology of the duodenum . . . 288

THERAPY PHYSICS BIOLOGY

INDICES to Vol. 7 (1968)

February April June August October December

Contents of Volume 7 — THERAPY PHYSICS BIOLOGY

Tissue oxygen tension of cervix cancer — Comparison of effects of breathing a carbon dioxide mixture and pure oxygen
By P. Bergsjø and J. C. Evans 1

Sarcoid-like lesions (epithelioid cell granulomatosis) of regional lymph nodes in association with carcinoma of the cervix
By B. Högstedt 12

Destruction of the hypophysis with implants of pure ^{90}Y metal
By G. Notter, O. Melander and L. Johansson 17

Pulsed high-intensity roentgen rays — Inactivation of human cells cultured in vitro and limitations on usefulness in radiotherapy
By P. Todd, H. S. Winchell, J. M. Feola and G. E. Jones 22

Pathologic effects of different doses of ^{90}Sr in mice — Development of carcinoma in the mucous membranes of the head
By A. Nilsson 27

Determination of small mass differences in roentgenography — I — Theoretical considerations
By G. Lysell, K. A. Mårtensson and K.-Å. Omnell 42

Commercial photodiodes as gamma and roentgen ray dosimeters
By P. E. Åsard and G. Baarsen 49

Radiation protection measurements for a 17 MeV betatron
By P. E. Åsard 59

Production of ^{18}F for bone scanning
By L. Patomäki 71

Book reviews 78

Telegamma therapy of laryngeal carcinoma
By O. Dahl, F. Jacobsson and R. Walstam 81

Acquired radioresistance following whole body irradiation
By V. Taenzer and E. Krokowski 88

Renographic analysis in radiation therapy of carcinoma of the uterus
By M. Brites Patrício and A. M. Baptista 97

Absorption of ^{212}Pb from the gastrointestinal tract of man
By J. B. Hursh and J. Suomela 108

Autoradiographic studies on distribution of radiocobalt chloride in pregnant mice
By H. Flodh 121

Effect of anatomical irregularities on the dose in electron beam therapy
By P. Karjalainen, M. Brenner and A. Rytilä 129

Threshold doses for conditioned avoidance behavior using low dose rate gamma radiations
By H. LeVan, R. Haas, H. Sassoon and F. Krown 141

Human radium assay at nanocurie levels using external counting of low energy photons
By L. G. Bengtsson 148
Books received 159
Cytoplasmic ultraviolet extinction of strontium-90-induced fibroblastic osteosarcomas correlated to histologic appearance and ultrastructure
By P. Sundelin and A. Nilsson 161
Topical treatment of ulcerative mammary carcinoma by thiotepa compresses
By A. P. Andersen, H. Brincker and A. Sell 171
Treatment method and dose distribution in radiotherapy of carcinoma of the cervix
By P. Bergsjö and P. Kristiansen 181
Endocurietherapy — A dosimetric study of two parallel radioactive sources
By B. Pierquin, A. Dutreix, C. Paine, D. Chassagne and A. Wambersie 193
Uptake of colloidal chromic phosphate in the mediastinal lymph nodes — Therapeutic possibilities
By L. J. Anghilery 202
Combined effect in the radiologic and immunologic treatment of a malignant homograft
By E. Kano 209
Empirical formulas for tissue correction factors in cobalt teletherapy
By E. Spring and P. Anttila 230
Iron filters as a means of reducing the dose in roentgen examination of the female breast
By S. Maudal 238
Aspiration biopsy in diagnosis of palpable lesions of the breast — Critical review of 3 479 consecutive biopsies
By S. Franzén and J. Zajicek 241
Modulation transfer function of the intensity distribution of the roentgen focal spot
By E. Takenaka, K. Kinoshita and R. Nakajima 263
Significance of focus size in irradiation therapy
By P. Klami 273
Roentgen stand for field positioning in high-energy radiotherapy
By B. Jung, B. Larsson, B. Rosengren, K. Ståhl and W. Wretlind 282
Vascular insufficiency in premalignant and pre-invasive squamous epithelium
By E. Rubinstein 289
Evaluation of experimental irradiation fractionation with the single-hit, multi-target model
By E. Spring and P. Holmberg 297
Late results following radiotherapy of skin cancer
By P. B. Hansen and M. S. Jensen 307
Book review 320
Effects of small doses of radioactive strontium on the rat bone marrow
By T. Stokke, P. Oftedal and A. Pappas 321
Influence of lactation on retention of radiostrontium in mice
By C. Rönnbäck, A. Nelson and A. Nilsson 330
Radiation-induced involution of the lymphatic organs of the young chicken
By J. L. Montour 337
Effect of testosterone treatment and hypophysectomy on the leucocyte count in irradiated rats
By E. Robinson and I. Chowers 346

Effects of radiation damage to bone marrow on susceptibility of chicks to erythroleukemia virus
By C. H. Chi and B. Lagerlöf 353
Clinical applications of a field positioning and simulating stand
By J. Johansson, B. Rosengren and B. Tjernberg 364
Intracavitary thiotepa in malignant pleural and peritoneal effusions
By A. P. Andersen and H. Brincker 369
Intercomparison of absorbed dose in cobalt 60 teletherapy using mailed LiF dosimeters
By P. M. Pfalzner and S. Malo Alvarez 379
Étude de la répartition des doses autour de sources ponctuelles alignées — Application en curiethérapie gynécologique
Par A. Dutreix et A. Wambersie 389
Determination of tumour dose by transmission measurements in roentgen rotation treatment of the oesophagus
By U.-B. Nordberg 401
Gastro-intestinal function after abdominal cobalt irradiation
By E. Ratzkowski and A. Hochman 417
Autopsy findings in lung cancer treated with megavoltage radiotherapy
By P. M. Rissanen, U. Tikka and L. R. Holsti 433
Some effects of data error in the analysis of radiotracer data
By J. Myhill 443
Incidence of second cancers after radon seed therapy for cervix cancer
By J. Graham and P. Burstein 453
Field control in roentgen therapy with a 5 MeV linear accelerator by means of television
By R. Malvén, B. Rosengren and H. Wallman 462
Röntgentechnische allgemeine Theorie
Von L. Csepinszky 467

Subject index to Volume 7 — Therapy Physics Biology

Radiotherapy

Tissue oxygen tension of cervix cancer 1
Sarcoid-like lesions of regional lymph nodes in association with carcinoma of the cervix 12
Pulsed high-intensity roentgen rays — Inactivation of human cells cultured in vitro and limitations on usefulness in radiotherapy. 22
Radiation protection measurements for a 17 MeV betatron 59
Telegamma therapy of laryngeal carcinoma 81
Acquired radioresistance following whole body irradiation 88
Renographic analysis in radiation therapy of carcinoma of uterus 97
Treatment method and dose distribution in radiotherapy of carcinoma of cervix . . . 181
Endocurietherapy — A dosimetric study of two parallel radioactive sources. 193
Late results following radiotherapy of skin cancer 307
Determination of tumour dose by transmission measurements in roentgen rotation treatment of the oesophagus 401
Gastro-intestinal function after abdominal cobalt irradiation 417
Autopsy findings in lung cancer treated with megavoltage radiotherapy 433
Incidence of second cancers after radon seed therapy for cervix cancer 453

Chemotherapy

Treatment of ulcerative mammary carcinoma by thiotepa compresses 171
Intracavitary thiotepa in malignant pleural and peritoneal effusions 369

Radioactive isotopes

Destruction of the hypophysis with implants of pure ^{90}Y metal 17
Pathologic effects of different doses of ^{90}Sr in mice 27
Production of ^{18}F for bone scanning 71
Absorption of ^{212}Pb from gastrointestinal tract of man 108
Autoradiographic studies on distribution of radiocobalt chloride in pregnant mice . . 121
Cytoplasmic ultraviolet extinction of strontium-90-induced fibroblastic osteosarcomas 161
Uptake of colloidal chromic phosphate in the mediastinal lymph nodes 202
Effects of small doses of radioactive strontium on the rat bone marrow 321
Influence of lactation on retention of radiostrontium in mice 330

Radiophysics

Determination of small mass differences in roentgenography — I — Theoretical considerations. 42
Commercial photodiodes as gamma and roentgen ray dosimeters 49

Radiation protection measurements for a 17 MeV betatron 59
Effect of anatomical irregularities on the dose in electron beam therapy 129
Threshold doses for conditioned avoidance behavior using low dose rate gamma radiations 141
Human radium assay at nanocurie levels using external counting of low energy photons 148
Treatment method and dose distribution in radiotherapy of carcinoma of cervix . . . 181
Endocurietherapy — A dosimetric study of two parallel radioactive sources 193
Empirical formulas for tissue correction factors in cobalt teletherapy 230
Iron filters as a means of reducing the dose in roentgen examination of the female breast 238
Modulation transfer function of the intensity distribution of the roentgen focal spot . . 263
Significance of focus size in irradiation therapy 273
Experimental irradiation fractionation with the single-hit, multi-target model 297
Intercomparison of absorbed dose in cobalt 60 teletherapy using mailed LiF dosimeters 379
Étude de la répartition des doses autour de source ponctuelles alignées 389
Determination of tumour dose by transmission measurements in roentgen rotation treatment of the oesophagus 401
Some effects of data error in the analysis of radiotracer data 443
Röntgentechnische allgemeine Theorie 467

Technique

Production of ^{18}F for bone scanning 71
Iron filters as a means of reducing the dose in roentgen examination of the female breast 238
Significance of focus size in irradiation therapy 273
Roentgen stand for field positioning in high-energy radiotherapy 282
Clinical applications of a field positioning and simulating stand 364
Field control in roentgen therapy with a 5 MeV linear accelerator 462

Radiobiology

Pulsed high-intensity roentgen rays — Inactivation of human cells cultured in vitro and limitations on usefulness in radiotherapy 22
Pathologic effects of different doses of ^{90}Sr in mice 27
Acquired radioresistance following whole body irradiation 88
Autoradiographic studies on distribution of radiocobalt chloride in pregnant mice . . 121
Cytoplasmic ultraviolet extinction of strontium-90-induced fibroblastic osteosarcomas 161
Combined effect in the radiologic and immunologic treatment of a malignant homograft 209
Vascular insufficiency in premalignant and pre-invasive squamous epithelium 289
Effects of small doses of radioactive strontium on the rat bone marrow 321
Influence of lactation on retention of radiostrontium in mice 330
Radiation-induced involution of the lymphatic organs of the young chicken 337
Effect of testosterone treatment and hypophysectomy on the leucocyte count in irradiated rats 346
Effects of radiation damage to bone marrow on susceptibility of chicks to erythroleukemia virus 353
Some effects of data error in the analysis of radiotracer data 443

Radiation protection

Radiation protection measurement for a 17 MeV betatron 59

Miscellaneous

Aspiration biopsy in diagnosis of palpable lesions of the breast 241

Book reviews

Dosimetrie zur Betatrontherapie 78
Current topics in radiation research 78
Biophysikalische Probleme der Strahlenwirkung 80
Strahlenschutz in Forschung und Praxis. 320
